

FRANKLIN REGIONAL COUNCIL OF GOVERNMENTS

425 Main Street, Suite 20, Greenfield, MA 01301-3313
Telephone 413-774-3167 • Fax 413-774-3169 • www.frcog.org
Executive Director • Linda Dunlavy

FEBRUARY 2009

NEWSLETTER

Council Reduces 2009 and 2010 Membership Assessments

In response to the Governor's cuts to local aid last week, at its January meeting the FRCOG Council voted to rebate the FY 2009 Regional Services Assessment by 10%. This is the membership fee that towns pay to the FRCOG and is used for the organization's administrative costs, special projects and advocacy efforts. This reduction will be reflected in fourth quarter assessments. Linda Dunlavy, Executive Director, and Pat Auchard, Finance Director, believe that this rebate can be absorbed by the FRCOG without making service cuts this year due to unexpected revenue and freezing of some expenditures. The Council's January quarterly meeting is the meeting that members adopt the next year's budget. The Finance Committee was prepared to present a 2010 budget with a 5% reduction to the Regional Services Assessment. After discussion, the Council voted to reduce the 2010 assessment by an additional 5% for a total of 10%. FRCOG staff and the Finance Committee will need to create a new 2010 budget to match this reduction in revenue. A new budget will be presented to the Council at its next quarterly meeting in April. Budget Advisory Notices will be sent to towns early next week explaining both reductions. For more information, contact Executive Director, Linda Dunlavy, at 413-774-3167 ext. 103 or lindad@frcog.org

Newly Designated Route 116 Scenic Byway

On August 4, 2008, the Massachusetts Legislature designated Route 116 in the towns of Deerfield, Conway, Ashfield, Plainfield, Savoy and Adams as a scenic byway. The Franklin Regional Council of Governments (FRCOG) is currently in the process of compiling an application to the National Scenic Byway Program for funding to complete a corridor management plan for this newly designated byway. The development of the corridor management plan will be a multi-regional collaborative effort including representatives from each town, the Berkshire Regional Planning Commission (BRPC), Franklin Regional Council of Governments (FRCOG), and the Pioneer Valley Planning Commission (PVPC). The overall purpose of a corridor management plan and accompanying public participation process is to: (1) identify and develop strategies to preserve the unique scenic, natural, and cultural resources along the byway; (2) expand economic opportunities related to heritage and recreational tourism; (3) plan for a byway roadside educational program promoting the history of the Route 116 Scenic Byway; (4) develop a land protection program for scenic and historic landscapes along the byway; and (5) develop a recreational program which identifies and establishes linkages to hiking trails, state forests, river access points and other cultural and recreational features along the byway. A corridor management plan does not change local zoning or restrict private land use. Completing a corridor management plan will qualify the scenic byway to apply for additional funding for eligible projects along the byway.

For further information please contact Senior Transportation Planner, Elizabeth Giannini, at 413-774-1194 ext. 104 or giannini@frcog.org.

Changes for FY2010 Highway Bids

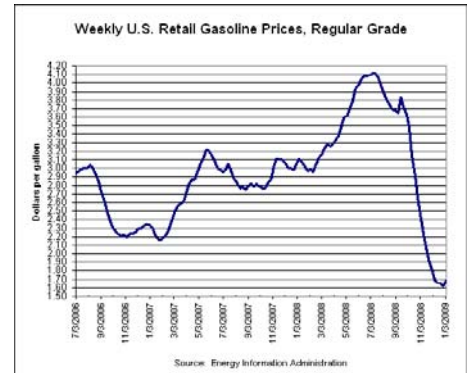

December 2008 changes stemming from the new transportation bond bill (MGL Chapter 303, Section 60 of the Acts of 2008) include expanded price adjustment provisions for highway projects. Due to volatile markets which affect asphalt, cement, diesel fuel, gasoline, and structural and reinforcing steel prices, MassHighway has instituted special provisions for projects which receive reimbursement from Chapter 90. The purpose of the adjustment requirements is to account for the cost of materials at the time the work is performed instead of at a time several months prior when bids are prepared. These new laws will affect several of the cooperative highway bids that the FRCOG administers.

FRCOG contracts which will be affected by these changes include H5 Culverts – Steel; H6 Guardrail Products, H10 Guardrails Installed, Grader and Plow Blades, H14 Stone Seal, H15 Bituminous Concrete, H16 Liquid Asphalt. Fuel for trucking involved in Excavation, Borrow Work, and Surfacing Work for specific chapter 90 projects will also require the escalation clause.

Prices will be set at a Base Price at the time of the bid, and when towns schedule their work to be done, they will need to check the Period Price for that month to get an accurate assessment of their total project cost. Contractors will be required to notify the towns either with certified invoices or other confirmation that the price for that commodity varies more than 5% from the base price. Prices may also decrease based on a lower period price.

A link to the Period Prices for these commodities will be available on the Cooperative Purchasing page of the FRCOG web-site.

For further information please contact Chief Procurement Officer, Andrea Woods, at 413-774-3167 ext. 104 or bids@frcog.org.

Fuel Price Chart Showing Volatility

Cooperative Purchasing Updates

- **Bids for Elevator Maintenance:** This would be for town buildings and is a new program of the FRCOG Purchasing Department. For more information, please contact, Chief Procurement Officer, Andrea Woods at 413-774-3167 ext. 104 or bids@frcog.org.
- **Fuel markets** continue to challenge conventional thinking. To meet the challenge an expanded fuel bidding program for FY10 is being planned with the hope of providing participating towns with choices to lock in a fixed price, ride the market with a mark-up over index price, or choose a capped price option. For more information, please contact, Chief Procurement Officer, Andrea Woods at 413-774-3167 ext. 104 at bids@frcog.org.
- **The Fee-for-Service Purchasing Program** is holding its costs down for towns by including local non-profit entities in the program – providing needed purchasing expertise and bulk purchasing power for agencies. The program will also level fund its bid participation fees in 2010. For more information on available programs for Non-profits please contact, Chief Procurement Officer, Andrea Woods at 413-774-3167 ext. 104 at bids@frcog.org.

FRCOG Coalition Leader Wins National Advocacy Award

Kat Allen, one of the Co-Coordinator of the FRCOG's Community Coalition for Teens (CCT) and one of the Co-Chairs of the Communities That Care Coalition has been selected as one of three "Advocate of the Year" awardees by the Community Anti-Drug Coalitions of America (CADCA). CADCA is a membership organization of over 5,000 anti-drug coalitions, and the award honors leaders in substance abuse prevention who have consistently gone above and beyond the call of duty to ensure legislative victories for the prevention field.

The Communities That Care Coalition (which is co-hosted by the Community Coalition for Teens and Community Action) was formed in 2002 on the premise that "a community that works together to apply positive, research-based strategies effectively reduces and prevents teen substance abuse and other risky behaviors". The Communities That Care Coalition has conducted a rigorous, community-wide strategic planning process, selected priority risk and protective factors for the community to address, formed four active workgroups, and selected and implemented research-based programs and practices to achieve the Coalition's goals. Kat's leadership and ability to teach others about the best practices of substance abuse prevention have been an important part of that success.

Kat Allen, Co-Coordinator of the FRCOG's Community Coalition for Teens (CCT) & Co-Chair of the Communities That Care Coalition (CTC) and U.S. Senator John Kerry

Regional Health Agent Makes Progress in Hoarding Cases

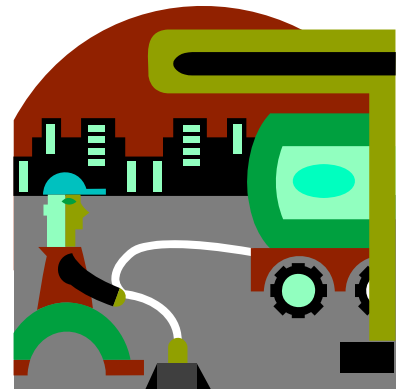

An example of what a Hoarding case would look like

The Regional Health Inspection Program is pleased to announce two positive developments in the region's ability to deal with complicated hoarding cases (excessive clutter leading to unsafe living conditions). First, a new Franklin County Hoarding Task Force has been convened and is meeting monthly, with plans for a support group for local people struggling with excessive clutter. Second, Regional Health Agent Glen Ayers recently wrote and received a small grant from the Rockwood Kenney Trust through the Community Foundation of Western Massachusetts. This grant will allow for assistance with dumpster fees in hoarding cases where the resident is working with the Program's member Boards of Health, but has financial difficulties in completing the clean-up process. The Regional Health Inspection Program currently serves Bernardston, Buckland, Charlemont, Gill, Hawley, Heath and Monroe. For more information, contact, Regional Health Agent, Glen Ayers, at 413-774-3167 ext. 108 or glenayers@frcog.org.

FRCOG Brownfields Program

With an award from the US Environmental Protection Agency (EPA), the FRCOG has successfully expanded its Brownfields Program by conducting environmental site assessments at properties that may be contaminated by gasoline or other petroleum products. So far, six properties in three towns have been assessed using these resources, with more sites anticipated to be assessed in Orange and Montague. The largest assessment conducted was at the Streeter Property on Church Street in Bernardston. Using grant resources, four underground tanks were removed and soil testing conducted. Additional sites may also be considered for inclusion in this program, as funding allows and as sites meet specific criteria. If there is an abandoned or vacant gasoline station or similar site where petroleum products (excluding home heating oil) were stored and your town is concerned about potential contamination, please contact Director of Planning & Development, Peggy Sloan, 413-774-1194 ext. 105 or psloan@frcog.org

Transportation News

The **Commonwealth's Accelerated Bridge Program** will invest \$3 billion over 8 years to repair structurally deficient bridges throughout Massachusetts. The Executive Office of Transportation (EOT) recently released its list of bridges slated for preservation or repair in calendar years 2009-2011. This list includes 7 bridges in 5 Franklin County communities:

1. Charlemont – Mountain Road over Hartwell Brook (bridge C-05-036)
2. Colrain – Route 112 over Griswoldville Canal (bridge C-18-023)
3. Conway – North Poland Road over Poland Brook (bridges C-20-003 and C-20-004) and Poland Road over South River (C-20-005)
4. Hawley – Route 8A over Chickley River (H-13-007)
5. New Salem – Dam Road over Quabbin Reservoir (N-09-003)

In addition, various repairs to I-91 bridges are slated, as are funds for other MassHighway Districts 1 and 2 maintenance and emergency repairs. For more information contact Transportation and GIS Program Manager, Maureen Mullaney, at the FRCOG at 413-774-1194 ext. 108, or log on to the EOT website www.mass.gov/acceleratedbridges and click "Bridge Project List" along the left of the homepage.

A **Statewide Transportation Plan** is being developed by the Executive Office of Transportation. A series of 10 public workshops were held in the Fall of 2008, and now EOT is beginning the process of assimilating all of the feedback into the Plan. A draft of the Plan will be available on-line soon at www.youmovemassachusetts.org. A **Statewide Freight and Rail Plan** is also under development by EOT. This effort undertakes a comprehensive evaluation of the Commonwealth's freight and rail transportation system, their operations, and their effect on economic development and quality of life. Input from freight haulers and other stakeholders was gathered in the Fall of 2008. For more information log on to www.massfreightandrailplan.com.

For more information about these or other transportation projects and initiatives, contact Transportation and GIS Program Manager, Maureen Mullaney, at 413-774-1194 ext. 108 or trans@frcog.org.

MRC & CERT Responds to Ice Storm in Western Massachusetts

Medical Reserve Corps (MRC) and Citizen Emergency Response Teams (CERT) volunteers were activated and sent to towns in Franklin and Worcester Counties after the debilitating ice storm on December 12th and 13th. These volunteers provided shelter staffing, medical, First Aid as needed, and emergency communications. More than 250 hours of volunteer service were provided by more than a dozen dedicated individuals who gave their time and talents and resources to help throughout the storm.

Unique to this group of individuals is multiple enrollments in volunteer organizations. Many volunteers were MRC, CERT and ham radio operators, so it is important to note that when these volunteers responded, they brought with them methods of communications as well as MRC and CERT skills.

As conditions improved in Franklin County but Worcester County was still in crisis, Franklin County MRC, CERT and ham radio volunteers went to help in Gardner and provided services to help in the shelters and provide emergency communications. Volunteers spent another two days and nights in Gardner before returning to Franklin County.

If you have other questions, concerns, or would like more information, contact MRC/CERT Coordinator, Chet Chin, at 413-772-5535 or mrc@frcog.org.

Broadband Update – Governor Appoints FRCOG to MBI Board

Last year, the Massachusetts Broadband Institute (MBI) and a \$40 million investment fund were created for the purpose of forming public-private partnerships that will invest in infrastructure to deploy broadband access to all unserved citizens. The MBI is guided by a nine-member Board of Directors. On January 14, 2009, Governor Patrick appointed Linda Dunlavy, FRCOG Executive Director, and Rick Oliveri of Baystate Health to the Board. Linda and Rick also serve as Co-Chairs of Pioneer Valley Connect. For the latest news and updates about broadband access issues from Pioneer Valley Connect, go to www.pioneervalleyconnect.org, or contact Economic Development Planner, Jessica Atwood at 413-774-1194 ext. 101 or jatwood@frcog.org.

Memorandum of Understanding (MOU) Proven To Work!

Nine towns of Franklin County have signed onto a county wide Memorandum of Understanding, known as the Franklin County Alcoholic Beverages Initiative. This initiative was promoted by the Communities That Care Coalition, and supports towns willing to work together on the enforcement of underage drinking laws. Regular alcohol compliance checks have been proven to reduce youth access to alcohol and the fatalities, sexual assault, and injuries and accidents resulting from underage drinking. Compliance Checks involve the use of underage buyers by law enforcement agencies as deputies to test retailers' compliance with laws regarding the sale of alcohol to minors. On December 8, 2008, The Town of Orange's Police Department completed alcohol compliance checks in the town of Orange and Gill, resulting in 11 compliant establishments of 12 establishments checked. Many barriers exist for small towns to conduct regular compliance checks. Specialized trainings for officers, underage persons, coordinator of compliance checks logistics as well as the checks themselves can be burdensome. The Community Coalition for Teens, a program of the Franklin Regional Council of Governments and one of the hosts of the Communities that Cares Coalition received funding from the Attorney General's Office and the Bureau of Substance Abuse to reimburse police departments for any staff time associated with the checks, and support the coordination of a regional effort on enforcement of underage drinking laws.

Community Coalition for Teens will continue to work with the FRCOG Regional Issues Committee in hopes that other towns in Franklin County will sign the Initiative. Orange, Gill as well as Bernardston, Shelburne, Buckland, Health, Whately and Deerfield have already signed on.

For More Information about alcohol compliance checks and the MOU, contact Substance Abuse Prevention Coordinator, Glenn Johnson, at 413-774-1194 ext. 117 or glennj@frcog.org.

Energy Savings Performance Contracting

Round one projects are underway in the initial 16 towns and 3 regional school districts. Preliminary audit reports are being completed by Siemens Building Technologies. The Town of Orange has signed an agreement to proceed with next-step Investment-Grade Audit. Performance Contracting round 2 is gearing up with the RFQ ready for review by the Massachusetts Department of Energy Resources. A selection committee, made up of representatives from participating towns and school districts, will be formed to review proposals, conduct interviews of responding Energy Services Companies (ESCOs) and select the successful ESCO. For more information, please contact, Director of Regional Services, Bob Dean at 413-774-3167 ext. 112 or bdean@frcog.org.

Trench Regulations

March 1, 2009 marks the implementation date for all towns and cities to begin issuing permits for trench excavations, both public and private, within municipal borders. More information is available on line at www.gov/dps. Click on "Trenches" on the left side of the page. FRCOG staff is actively working with area legislators and the Mass. Municipal Association to advocate for reasonable changes to the law and associated regulations. For more information, please contact, Director of Regional Services, Bob Dean at 413-774-3167 ext. 112 or bdean@frcog.org.

Regional Preparedness Program Updates

- Three Emergency Dispensing Sites (EDS) in the Mohawk Area Public Health Coalition conducted Emergency Dispensing exercises, testing their ability to respond to threats ranging from a pandemic flu to a bio-terrorism attack. Collectively they received more than \$22,000 in support from the Western Regional Homeland Security Advisory Council. This spring two additional EDS sites plan on exercising their “mass prophylaxis” plans, and are also seeking support from the Western Regional Homeland Security Advisory Council. For more information, please email Thomas Williams at twilliams@frcog.org.
- The Regional Emergency Planning Committee (REPC) will be conducting two exercises this spring. The first is an Advanced Table Top (TTX) exercise designed to test regional evacuation planning. It will be held in the Town of Deerfield on May 20, 2009. The second combines a workshop, table top and functional exercise to test regional communications equipment and plans. For more information, please contact, Regional Preparedness Program Manager, Thomas Williams, at 413-774-3167 ext. 118 or twilliams@frcog.org.
- Following the recent ice storm, the Regional Emergency Planning Committee (REPC) has formed a sub-committee to explore the question of how to coordinate the use of local resources (people, equipment, and supplies) in ways that more effectively serve the entire region. For more information, please contact, Regional Preparedness Program Manager, Thomas Williams, at 413-774-3167 ext. 118 or twilliams@frcog.org.
- The REPC is nearing completion on its Comprehensive Disaster Debris Management Plan and Action Manual. This project, which took nearly two years, was funded by the United States Department of Agriculture Rural Development Office. For more information, please contact, Regional Preparedness Program Manager, Thomas Williams, at 413-774-3167 ext. 118 or twilliams@frcog.org.

Homeland Security Funding Opportunities

- **Homeland Security Funds for NIMS Maintenance:** The Western Regional Homeland Security Advisory Council (WRHSAC) has ongoing funds available for backfill/ overtime or volunteer reimbursement for hourly and volunteer first-responders to maintain NIMS compliance. Funding is available for newly promoted, re-assigned staff, newly hired and previously vacant positions. For more information email Susan Brown at sbrown@frcog.org.
- **COOP Reimbursement:** Communities may be reimbursed up to \$750 to assist with the costs of developing or updating local COOPs (Continuity of Operations Plans). The deadline to submit for reimbursement is March 31, 2009. For more information and appropriate forms email Susan Brown at sbrown@frcog.org.

Pictometry Software Update and Training Scheduled

In 2004 all Franklin County towns received electronic, high resolution aerial photographs available from the Franklin Regional Council of Governments through a license agreement between MassHighway and the company that took the photos, Pictometry, Inc. Recently, Pictometry updated the software and aerial photos for our area. This unique software allows users to measure distances, area, and height for objects and land masses in the aerial photos, as well as integrate custom Geographic Information System (GIS) data and other features on top of aerial photos to make customized maps. Over the last few years, the Pictometry software and images have been used by many local police and fire departments, town assessors, emergency responders, conservation commissions, planners and local elected officials.

The Pictometry update to the software and images is available **free of charge** to all municipal departments within your town. The new images are from a flyover that took place in April and May of 2008. If you are interested in receiving this software update and the new images, please attend a training session scheduled for **February 24, 2009 at the Deerfield Town Hall (located at 8 Conway Street in South Deerfield) from 1:00 pm to 5:00 pm**. At that time, we will provide your town with one external hard drive that contains the updated Pictometry data for your town. Staff from Pictometry, Inc. will also be at the meeting to teach new users and refresh current users on the technology.

Please RSVP to Senior GIS Specialist, Ryan Clary, at 413-774-1194 ext. 102 or gis@frcog.org if you plan to attend the training. If you are unable to attend, but would like to receive the update, please contact Ryan to make other arrangements.

Heritage Landscape Inventory

The Franklin Regional Council of Governments (FRCOG) is partnering with the Pioneer Valley Planning Commission (PVPC) to work with 12 communities that have been selected for the Department of Conservation and Recreation's (DCR) Heritage Landscape Inventory Program. The communities that have been selected to participate in the program in Franklin County are Bernardston, Greenfield, Leverett, New Salem, and Whately.

DCR defines Heritage Landscapes as those special places that contain both natural and cultural resources that have influenced the use and development of land and help define a community's character. Local public identification meetings have been taking place in participating communities at which residents have come together to identify and prioritize heritage landscapes. There are many types of Heritage Landscapes, and each community has voted to prioritize 5 or 6 that they feel are the most important for this program. Examples of heritage landscapes that have been identified so far include the Peace Pagoda in Leverett, Whately cemeteries, the Bernardston Village Center, and the Poet Seat Tower on Rocky Mountain in Greenfield.

FRCOG planning staff will be conducting research and fieldwork at priority sites, and will then complete a report for each community. The report will include a list of all heritage landscapes from the public meeting, with particular focus given to the 5 or 6 priority areas, including recommendations aimed at preserving and/or bringing awareness to these areas. For more information about this program contact Land Use Program Manager, Melissa Adams, at 413-774-1194 ext. 107 or adams@frcog.org

Bernardston Village Center

Poet Seat Tower in Rocky Mountain area of Greenfield

Peace Pagoda in Leverett

Whately cemeteries

Outdoor Wood-fired Boiler Update

The State Department of Environmental Protection (DEP) has issued new regulations that govern “Outdoor Hydronic Heaters” also known as Outdoor Wood Boilers or OWBs, in both residential and commercial settings. As of December 26, 2008 all new OWB units sold in Massachusetts must meet the EPA “Phase II” emission standard and must have been tested and certified, as indicated by a permanently attached label.

Residential units (less than 350,000 BTU/hr) must be located at least 50 feet from the property line and at least 75 feet from the nearest occupied dwelling not served by the unit. Commercial sized units must be located at least 275 feet from the property line and at least 300 feet from the nearest occupied dwelling not served by the unit. All new OWB units that are located less than 150 feet from the nearest occupied dwelling not served by the unit must have a smoke stack that is at least two feet higher than the peak of any roof located within 150 feet of the unit. Units meeting the Phase II emission standard may be operated year-round.

Existing OWBs that do not meet the emission standard may continue to be used with the following restrictions: 1.) If the distance to another residence is less than 150 feet, the smokestack must be two feet higher than any roof located within 150 feet of the unit, and the unit may only be operated between Oct. 1 and May 15. 2.) If the distance to another residence is between 150 feet and 500 feet, the smokestack height must be in accordance with the manufacturer’s specs, but the unit may only be operated between Oct. 1 and May 15. 3.) If the unit is more than 500 feet from another residence, the smokestack height must be in accordance with the manufacturer’s specs, and the unit may be operated year-round. Stack heights must come into compliance by March 1, 2009.

No OWB is permitted to cause a nuisance or create an air pollution problem. OWBs may only burn clean dry, seasoned wood. All units must comply with local rules, as the DEP regulations do not pre-empt local Home Rule. Enforcement of the new regulations is authorized by any Police Department, Fire Department, Board of Health Official, or the Building Inspector, as well as by the DEP. The full regulations and other materials can be found at the DEP web site.

The FRCOG Regional Health Program will be conducting an OWB training session with the DEP at an upcoming Board of Health Capacity Building Workshop on March 4 at 6:00 p.m. Anyone with questions can contact Regional Health Agent, Glen Ayers, at 413-774-3167 ext. 108 or glenayers@frcog.org.
